

ELEGANCE

URBAN

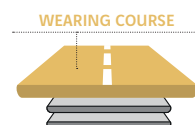

Unavoidable

Lumivia®

ASPHALT CONCRETE

The road in
a new light

WHY LUMIVIA®?

There are various ways to differentiate between several developments by means of the surfacings. Varying colours, choosing different textures... or constantly playing with the ambient light. Day and night, all the lights of the city are reflected on the pavement, which helps to decorate the space and enhance the sites along the roadway.

Lumivia® is obtained by substituting some of the aggregates in the formula with mirror fragments from recycling, the quantity of which will be defined according to the customer's desired appearance. Lumivia® retains the properties of an asphalt mix, plus the luminous effect, with no additional energy input.

**Sparkling and durable,
Lumivia® gives your urban
development a new lease of life.**

A sparkling surface effect

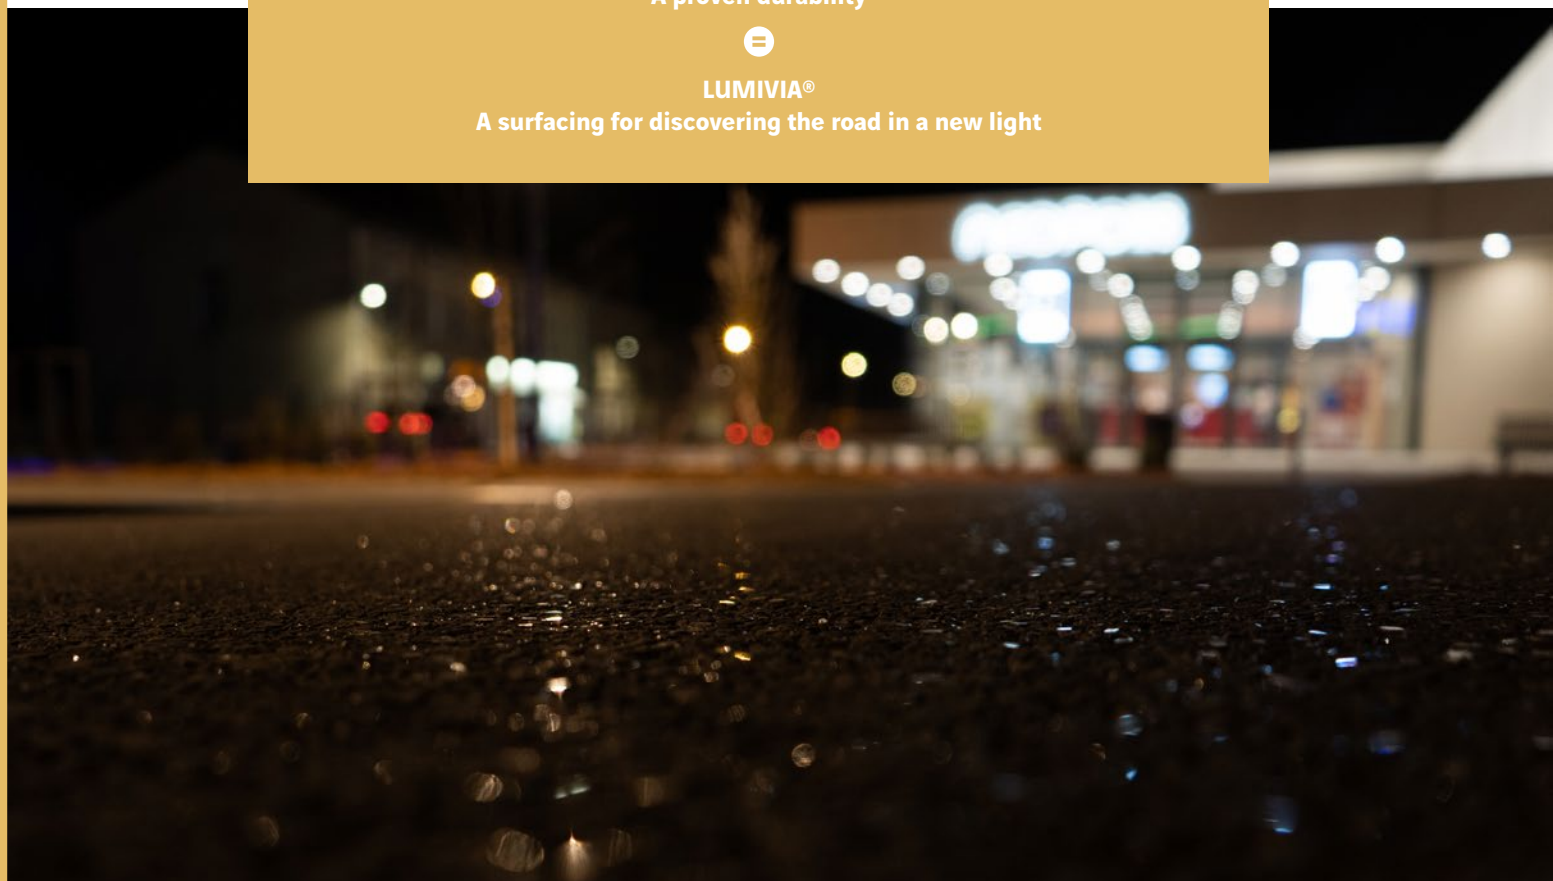

A proven durability

LUMIVIA®

A surfacing for discovering the road in a new light

ITS STRONG POINTS

A new aesthetic dimension for the road

- Improvement of the readability of the development
- Good rutting resistance
- Good shear strength
- Can be produced using warm Tempera® processes
- Possible use of reclaimed asphalt pavement
- Valorisation of mirrors from the circular economy

THE SURFACING THAT BEAUTIFIES THE URBAN SPACE

OUR RECOMMENDATIONS

TYPE OF TRAFFIC

Lumivia® can be used for all types of traffic.

TYPE OF USE

Lumivia® is suitable for all types of urban roads and public access areas (museums, swimming pools, shopping centres).

TYPE OF LAYING

Lumivia® is laid like any traditional asphalt concrete, with the mirrors being incorporated into the asphalt mix formula.

PRECAUTIONS FOR USE

Depending on the traffic on Lumivia®, a surface treatment can be carried out to activate the sparkling effect.

**Lumivia® makes it possible
to sublimate your urban development
with the elegance of light.**

**Partner of the territories,
Vinci Construction develops
solutions of mobility to improve
economic competitiveness
and strengthen the social
bond by design, construction
and maintenance of transport
infrastructure and urban
development.**
